Title

Freight Analysis Framework
Version 6 User's Guide

Key Words

Freight Analysis Framework; FAF6;
user guide; freight flows; commodity
codes; transportation modes; FAF
regions; data dictionary

Abstract

This user's guide provides an overview of the Freight Analysis Framework Version 6 (FAF6), including its basic definitions, data structure, and available data products. It describes key elements of the dataset, such as transportation modes, commodity classifications, regions, and trade flows, and includes code tables and a data dictionary to support data interpretation and use.

Quality Assurance Statement

The Bureau of Transportation Statistics (BTS) provides high quality information to serve government, industry, and the public in a manner that promotes public understanding. Standards and policies are used to ensure and maximize the quality, objectivity, utility, and integrity of its information. BTS reviews quality issues on a regular basis and adjusts its programs and processes to ensure continuous quality improvement.

Table 1. FAF Modes	5
Table 2. FAF Commodity Codes	6
Table 3. FAF Domestic Regions.....	7
Table 4. FAF Foreign Regions	10
Table 5. Data Dictionary for FAF Dataset.....	11

1. Basic Definitions

1.1. MODE OF TRANSPORTATION

Same as FAF5, FAF6 includes the seven modes of transportation from the Commodity Flow Survey (CFS) plus an extra category involving imports. Table 1 in Section 3 provides a summary and brief description of each mode.

- **Domestic Modes** are the modes used between domestic origins and destinations, modes used between zones of entry and domestic destination for imports, and modes used between domestic origins and zones of exit for exports.
- **Foreign Modes** comprise the mode of arrival to zones of entry within the U.S. for imports or mode of departure from zones of exit within the U.S. for exports.

Note about Multiple Modes and Mail: FAF and the CFS use Multiple Modes and Mail rather than intermodal to represent movements of commodities that utilize more than one mode. Intermodal typically refers to containerized cargo that moves between ship and surface modes or between truck and rail. Shipments reported as Multiple Modes can include anything from containerized cargo to coal moving from mine to railhead by truck and rail to harbor. The “Mail” component recognizes that shippers who use parcel delivery services typically do not know what modes were involved after the shipment was picked up.

1.2. TYPE OF COMMODITY

Commodities are classified at the 2-digit level of the Standard Classification of Transported Goods (SCTG), summarized in Table 2. A complete description of these categories and their constituent parts can be found on the [Bureau of Transportation Statistics \(BTS\)'s CFS website](#).

1.3. GEOGRAPHY

To minimize potential confusion between geography-related terms, the following convention is used in this document.

- **Origin**—The beginning of a freight movement regardless of geography
 - Domestic Origin
 - For domestic freight movement, the FAF region or state where a freight movement begins
 - For imports, the FAF region or state where a freight movement begins the domestic portion of the trip (see Zone of Entry)
 - For exports, the FAF region or state where a freight movement begins the domestic portion of the trip
 - Foreign Origin—For imports, the foreign region where a freight movement begins
- **Destination**—The ending of a freight movement regardless of geography
 - Domestic Destination
 - For domestic freight movements, the FAF region or state where a freight movement ends
 - For imports, the FAF region or state where a freight movement ends the domestic portion of the trip

- For exports, the FAF region or state where a freight movement ends the domestic portion of the trip (see Zone of Exit)
 - Foreign Destination—For exports, the foreign region where a freight movement ends
- **FAF Region**—The 134 domestic regions, defined in Table 3.
- **State**—The 50 States and Washington, D.C.
- **Foreign Region**—The 8 international regions defined in Table 4, based on the information obtained from the [United Nations Statistics Division](#). Specific countries included in each region are presented in Appendix A.
- **Zone of Entry**—This is the FAF region or state where an import enters the United States. This term refers to the entire region or state and does not limit to any single location. This replaces the term “international gateway” used previously.
- **Zone of Exit**—This is the FAF region or state where an export leaves the United States. This term refers to the entire region or state and does not limit to any single location.

2. Accessing FAF6 Data

FAF6 can be accessed from the BTS's [FAF website](#). Users can download the entire FAF6 regional origin-destination-commodity-mode (ODCM) dataset directly from these websites or customize datasets by utilizing [FAF6 Data Tabulation Tool \(DTT\)](#).

2.1. ORIGIN-DESTINATION-COMMODITY-MODE DATABASE

FAF6 data sets are available at the FAF6 domestic region level and the state level, both provided in Microsoft Access and Comma Separated Values (CSV) formats.

2.1.1. FAF Regional Database

FAF6 domestic region level datasets and products provide information for states, state portions of large metropolitan areas, and remainders of states as listed in Table 3. Metropolitan areas consist of Metropolitan Statistical Areas or Consolidated Statistical Areas as defined by the Office of Management and Budget. When a metropolitan area is entirely within a state or when a state's portion of a multi-state metropolitan area is large enough to support the sampling procedures in the CFS, the area becomes a separate FAF region. Small single-state metropolitan areas and small portions of a multi-state metropolitan area are part of the State or Remainder of State.

2.1.2. State-Level Database

The state-level datasets and products include information for the 50 States and the District of Columbia. Updated historical base-year data, including 1997, 2002, 2007, 2012, and 2017, are planned for FAF6 to provide a more consistent time series of freight flow information based on FAF6 methodology and data sources. These historical data products are expected to be released at the state level.

2.2. DATA TABULATION TOOL (DTT)

The DTT is a web-based interface that allows FAF users to select specific categories of data, through easy-to-use pull-down menus, to create customized subsets of FAF6 data. Users can choose one of the three types of FAF6 data: Total Flows, Domestic Flows, and Foreign Trade Flows (Import and Export Flows).

- **Total Flows** contains the data associated with freight moved between domestic origins and domestic destinations and includes both domestic and foreign shipments. For import shipments, the origin of the flow is zone of entry (the FAF region or state of entry), and for export shipments, the destination of the flow is zone of exit (the FAF region or state of exit). Mode of transportation for Total Flows is the mode used within and between domestic regions or states.
- **Domestic Flows** contains only shipments associated with domestic freight moved between domestic origins and domestic destinations. Domestic movements of foreign trade flows (i.e., movements of international shipments inside the U.S.) are not included in the Domestic Flows. Mode of transportation for the Domestic Flows is the mode used within domestic regions or states.

- **Foreign Trade Flows**
 - **Import Flows** contains data associated with freight moved from foreign origins to domestic destinations. Geographies for this flow data include Foreign Origin, US Entry Region (Domestic Origin), and Domestic Destination. Mode of transportation consists of two parts: (1) foreign mode used between a foreign origin zone and a zone of entry in the United States and (2) domestic mode used between the zone of entry and its domestic destination.
 - **Export Flows** contains data associated with freight moved from domestic origins to foreign destinations. Geographies for this flow data include Domestic Origin, US Exit Region (Domestic Destination), and Foreign Destination. Mode of transportation consists of two parts: (1) domestic mode used between the domestic origin of the shipment and its zone of exit and (2) foreign mode used between the zone of exit and foreign destination.

2.3. SUMMARY STATISTICS

FAF6 includes several pre-generated summary data products providing commonly used statistics. Statistics reports are typically Excel spreadsheets, which can be opened, viewed, and saved or downloaded for later processing.

Specifically, a series of Excel worksheets were generated using total flows that moved between domestic origins and destinations, including both domestic and foreign shipments. The foreign shipments represent flows between the region of entry and the destination for imported shipments and flows between the origin and the region of exit for exported shipments. Modes of transportation provided in these tables are the modes used within domestic regions. Geographies for these domestic origins and destinations include both state and FAF zone. Five worksheets are available for the FAF6 regional and state databases as follows:

- Tonnage/value for shipments within, from, and to state/FAF zone by trade type and mode
- Tonnage/value for shipments within, from, and to state/FAF zone by commodity
- Top ten commodities by tonnage/value shipped within, from, and to state/FAF zone
- Top five trade partners by tonnage/value
- Top 50 origin-destination pairs by tonnage/value

The worksheets contain a spreadsheet for each measure and its corresponding percentage of the total measure that is accessed by clicking on the appropriate tab at the bottom of the Excel worksheet. Note that “Million Dollars” is the unit of measure for value and “thousand tons” is the unit of measure for weight. These worksheets contain pivot tables that filter and format FAF data into easily readable and printable tables. When a worksheet is first opened, it defaults to display all states/FAF zones. A small filtering icon (▼) on the right-side of table headings allows you to change what is displayed by clicking on the icon and checking the desired box(s) in the drop-down menu. You should be aware that these filters do not carry over from spreadsheet to spreadsheet and you will need to select them for each one.

3. Code Tables and Data Dictionary

Table 1. FAF Modes

Code	Mode	Description
1	Truck	Includes private and for-hire trucks. Does not include truck that is part of Multiple Modes and Mail or truck moves in conjunction with domestic air cargo.
2	Rail	Includes any common carrier or private railroad. Does not include rail that is part of Multiple Modes and Mail .
3	Water	Includes shallow draft, deep draft, Great Lakes, and intra-port shipments. Does not include water that is part of Multiple Modes and Mail .
4	Air (includes truck-air)	Includes shipments move by air or a combination of truck and air in commercial or private aircraft. Includes air freight and air express. In the case of imports and exports by air, domestic moves by ground to and from the port of entry or exit are categorized with Truck .
5	Multiple Modes and Mail	Includes shipments by multiple modes and by parcel delivery services, U.S. Postal Service, or couriers (capped at 150 pounds). This category is not limited to containerized or trailer-on-flatcar shipments.
6	Pipeline	Includes crude petroleum, natural gas, and product pipelines. Note: It also includes pipeline flows from offshore wells to land, which are counted as Water moves by the U.S. Army Corps of Engineers. Does not include pipeline that is part of Multiple Modes and Mail .
7	Other and Unknown	Includes movements not elsewhere classified such as flyaway aircraft, and shipments for which the mode cannot be determined.
8	No Domestic Mode	Includes shipments that have an international mode, but no domestic mode and is limited to import shipments of crude petroleum transferred directly from inbound ships to a U.S. refinery at the zone of entry. This classification enables a proper accounting of flows that do not utilize any domestic transportation network.

Table 2. FAF Commodity Codes

Code	Commodity Description
01	Animals and Fish (live)
02	Cereal Grains (includes seed)
03	Agricultural Products (excludes Animal Feed, Cereal Grains, and Forage Products)
04	Animal Feed, Eggs, Honey, and Other Products of Animal Origin
05	Meat, Poultry, Fish, Seafood, and Their Preparations
06	Milled Grain Products and Preparations, and Bakery Products
07	Other Prepared Foodstuffs, Fats and Oils
08	Alcoholic Beverages and Denatured Alcohol
09	Tobacco Products
10	Monumental or Building Stone
11	Natural Sands
12	Gravel and Crushed Stone (excludes Dolomite and Slate)
13	Other Non-Metallic Minerals not elsewhere classified
14	Metallic Ores and Concentrates
15	Coal
16	Crude Petroleum
17	Gasoline, Aviation Turbine Fuel, and Ethanol (includes Kerosene, and Fuel Alcohols)
18	Fuel Oils (includes Diesel, Bunker C, and Biodiesel)
19	Natural gas and other fossil products
20	Basic Chemicals
21	Pharmaceutical Products
22	Fertilizers
23	Other Chemical Products and Preparations
24	Plastics and Rubber
25	Logs and Other Wood in the Rough
26	Wood Products
27	Pulp, Newsprint, Paper, and Paperboard
28	Paper or Paperboard Articles
29	Printed Products
30	Textiles, Leather, and Articles of Textiles or Leather
31	Non-Metallic Mineral Products
32	Base Metal in Primary or Semi-Finished Forms and in Finished Basic Shapes
33	Articles of Base Metal
34	Machinery
35	Electronic and Other Electrical Equipment and Components, and Office Equipment
36	Motorized and Other Vehicles (includes parts)
37	Transportation Equipment, not elsewhere classified
38	Precision Instruments and Apparatus
39	Furniture, Mattresses and Mattress Supports, Lamps, Lighting Fittings, and Illuminated Signs
40	Miscellaneous Manufactured Products
41	Waste and Scrap (excludes of agriculture or food)
43	Mixed Freight

Table 3. FAF Domestic Regions

CFS Area	FAF Zone	Zone Description
01-142	011	Birmingham-Hoover-Talladega, AL CFS Area
01-380	012	Mobile-Daphne-Fairhope, AL CFS Area
01-99999	019	Remainder of Alabama
02-99999	020	Alaska
04-429	041	Phoenix-Mesa, AZ CFS Area
04-536	042	Tucson-Nogales, AZ CFS Area
04-99999	049	Remainder of Arizona
05-99999	050	Arkansas
06-348	061	Los Angeles-Long Beach, CA CFS Area
06-472	062	Sacramento-Roseville, CA CFS Area
06-41740	063	San Diego-Chula Vista-Carlsbad, CA CFS Area
06-488	064	San Jose-San Francisco-Oakland, CA CFS Area
06-260	065	Fresno-Madera-Hanford, CA CFS Area
06-99999	069	Remainder of California
08-216	081	Denver-Aurora, CO CFS Area
08-99999	089	Remainder of Colorado
09-25540	091	Hartford-East Hartford-Middletown, CT CFS Area
09-408	092	New York-Newark, NY-NJ-CT-PA CFS Area (CT Part)
09-99999	099	Remainder of Connecticut
